Electronic Balance, 5,000g, 2 Digit

Model **MSCF61113SWISS** | Brand **Master Science** | Unit **Pc**

Electronic Balance

The MSCF61113SWISS laboratory electronic balance is a high-precision weighing device extensively used in fields such as chemistry, biology, and material science. This balance converts mass into an electrical signal through mechanisms like electromagnetic force balance, piezoelectric effect, or capacitance measurement, delivering highly accurate results.

KEY HIGHLIGHTS

- AC/DC Power Supply
- Balance Protection
- User-Friendly Interface
- Comprehensive System Operations
- Versatile Operation

Key Features

AC/DC Power Supply
Dual power options for flexibility, allowing both AC and DC operation.

Balance Protection
A specialized sensor locking mechanism ensures secure transportation of the balance.

User-Friendly Interface
An LCD display with fast weighing response and high stability for reliable performance.

FUNCTIONS

Comprehensive System Operations
Includes auto-counting, percentage measurement, and multi-point calibration.

Versatile Operation
Supports unit conversion (e.g., metric carat, gold ounce), stability functions, memory storage, and full-scale taring.

POWER SUPPLY

Battery Options
For capacities below 10kg, can operate on a power cord or a 9V battery (battery not included). For capacities of 10kg and above, requires a power cord and accumulator.

Technical Specifications

PARAMETER	SPECIFICATION
VoltageAC110/220V±10%, 50/60Hz	
Capacity0 - 5000g	
Readability0.01g	
Repeatability0.03g	
Linearity Error0.03g	
Scale Size160 x 160 mm	
Gross Weight2.5 kg	
ConnectivityBuilt-in RS232C output interface allows seamless connection to computers and printers.	

Standard Accessories Included

- 366 x 266 x 171 mm
- The MSCF61113SWISS laboratory balance combines precision, reliability, and user convenience, making it a valuable tool for a wide range of scientific applications.
